

UI/UX Developer

PublicRelay is currently seeking for a UI/UX Developer to join our world-class software development team. The right candidate will be an expert in front-end technologies and best practices in user-interface design, and will have the opportunity to further develop and refine our market-leading PR intelligence platform.

The UI/UX Developer will be tasked with creating high-quality, unique web and mobile experiences for our clients that utilize the latest and most advanced aspects of front end design and technology.

Responsibilities:

The UI/XU Developer will design and implement new system features, and be responsible for:

- Participating in the identification of requirements from stakeholders and end-users
- Creating UI mockups that represent an engaging and effective interface
- Implementing new or enhanced screens
- Implementing UI test scripts
- Manual regression testing, as needed, to support the release process
- Supporting other development team members

Requirements

- Expertise with front-end technologies, including XHTML, HTML 5, CSS, and JavaScript
- Hands-on work with UI frameworks, such as JQuery, Ajax DoJo, or ActionScript
- Expertise with JSON, XML, and other encoding standards
- Experience implementing advanced Search Engine Optimization (SEO) techniques
- Experience developing in a web CMS, such as Jahia, Drupal, Joomla, or similar
- Basic knowledge of Java
- Experience developing for an application server platform, such as Apache Tomcat or JBoss
- Experience with agile development methodologies
- Experience with software configuration management and build systems, such as GIT/Hudson or Subversion/Ant

Qualifications

- 4-6 years of web design and development experience
- Bachelor's degree in appropriate discipline, or equivalent work experience
- Demonstrated success in solving difficult technical challenges, producing consistently high-quality code, and delivering projects on-time.
